

ABSTRACT

The present invention relates to an information providing apparatus and an information providing apparatus. Images which are consecutive in time series are sequentially enlarged and displayed such that the enlarged images are continuous spirally in the time-series order from the inner circumferential side. In this manner, according to the present invention, it is possible to understand easily a before-after relationship between a large number of images which are consecutive in time series by applying the present invention to a set-top box for digital satellite broadcasting, for example.
